

Major Microsoft products reach **end of support** soon.

PREPARE NOW. DON'T WAIT.

MINIMIZE INTERRUPTION TO YOUR BUSINESS OR ORGANIZATION

Brooks Jeffrey Computer Services can help!

End of support means **security updates are no longer provided.** Microsoft recommends that you **upgrade** to the latest cloud or on-premise version in order to remain secure.

SMOOTH TRANSITIONS ARE WELL PLANNED.

With Microsoft's stricter requirements for Windows 11, your business or organization may be looking at replacing many of the systems on your network in order to stay up to date. The Microsoft Certified Professionals at Brooks Jeffrey can evaluate your network, software, and equipment to determine the best plan to upgrade your systems with the least burden to your business and staff. We'll determine if there are hardware or software issues that may affect your upgrade and present a plan to complete your transition to the latest Microsoft products.

Client operating systems	Latest update or service pack	End of extended support
Windows 7	Service Pack 1	January 14, 2020
Windows 8	Windows 8.1	January 10, 2023
Windows Server 2012	Server 2012 R2	October 10, 2023
Windows 10		October 14, 2025

For a complete list of end of support deadlines and migration information for your products, go to:
